

# The BIG, BRILLIANT, BOUNCY bus ride to Nuclear

## Bus timetable

**Stop 1** Big diggers search the ground for the precious metal called URANIUM.

**Stop 2** The Uranium is sent to a big factory and put into a REACTOR where it gets very hot and spins big fans.

**Stop 3** The fans are connected to the ELECTRICITY GRID and push the electric into our homes, schools and shops.

**Stop 4** The electricity runs to our HOME, SCHOOLS and SHOPS. This means we can watch TV, cook dinner, get a shower and put the heating on!

What stop are you getting off at?

# About Us

Women in Nuclear UK (WiN UK) is one of over 30 international chapters under the umbrella of Women in Nuclear Global. Formed in 2014, WiN UK's mission is to address the industry's gender balance, improve the representation of women in leadership, engage with the industry, government and public on nuclear issues and support the industry with tools and information.

Our vision is for the Nuclear Industry to achieve gender balance within its workforce, reflecting the working population in the UK. Specifically, our work aims to meet the targets set in the Nuclear Sector Deal and Gender Roadmap of:

- 50% of all apprenticeships to be held by females by 2021
- 40% of the UK nuclear workforce to be female by 2030
- Increase the proportion of women in senior management to 30% by 2030
